

ASX RELEASE (15 APRIL 2025)

## Retraction re Mungana Processing Plant Capacity

Tartana Minerals Limited (ASX: TAT) (the Company), refers to its announcement dated 14 April 2025 titled "Tartana to Process Copper Ore in the Mungana Plant" (the **Earlier Announcement**) and provides the following retraction.

The Earlier Announcement disclosed that the Mungana processing plant 'has a rated capacity of 600,000 tpa' and further:

- that it will target 'production between 5,000 and 10,000 tonnes of copper in concentrate' in the first year of production; and
- provided information on proposed mining operations to support production at the Mungana plant under the heading "Tartana Open Pit Optimisation and Mine Plan"

(the **Production Target Statements**).

Although the Production Target Statements were not expressly intended to be a forecast production level or a production target but rather a statement as to the production potential of the Mungana plant, the Company retracts all references in the Earlier Announcement to the Production Target Statements. This retraction is being issued as the Company is not presently able to provide all information required by ASX Listing Rules 5.16 and 5.17 in relation to a 'production target' (as that term is defined in the ASX Listing Rules).

As the Production Target Statements are being retracted, the Company warns investors that they should not rely on the Production Target Statements as a basis for investment decisions.

Tartana and MEC Mining are completing further work to establish a mine plan that will define final extraction tonnages and other metrics necessary to formally develop a forecast production target. The Company will consider issuing a formal forecast production target and further information on the mine planning as these works complete.

ENDS

This announcement has been approved by the Managing Director of Tartana Minerals Limited (ASX:TAT).

### About Tartana Minerals Limited (ASX:TAT)

Tartana Minerals Limited (ASX:TAT) is a copper producer with an existing heap leach – solvent extraction – crystallisation plant located on its Tartana mining leases in the Chillagoe Region of Far North Queensland. It has also been investigating the development of its primary copper and zinc resources located on these mining leases. Elsewhere it has an extensive exploration portfolio including the Chillagoe, Herberton and Ortona project areas and individual projects such as Cherry Tree, Beefwood, Dimbulah and Fulford. These projects cover copper, zinc, gold, silver, tin, tungsten and antimony projects and includes the Maid Gold Resource.

### **Disclaimer Regarding Forward-Looking Statements**

This ASX announcement contains various forward-looking statements. All statements, other than statements of historical fact, are forward-looking statements. Forward-looking statements are inherently subject to uncertainties in that they may be affected by a variety of known and unknown risks, variables and factors that could cause actual values or results, and performance or achievements to differ materially from the expectations described in such forward-looking statements. Tartana Minerals Limited does not give any assurance that the anticipated results, performance or achievements expressed or implied in those forward-looking statements will be achieved.
