

ASX RELEASE (24 APRIL 2025)

## Clarification of prior disclosures on Beefwood Project and Project Update

Tartana Minerals Limited (ASX: TAT) (the **Company** or **Tartana**) refers to its earlier ASX announcements of 3 August 2021, 5 January 2023, and 15 April 2025 relating to the Beefwood project owned by Tartana, and provides the following clarifications.

In the 3 August 2021 announcement, the Company provided exploration results relating to the Beefwood project (the **Original Announcement**). The Original Announcement included a JORC Table 1 and other information required by the ASX Listing Rules. In subsequent references to those exploration results, the Company did not direct readers to the Original Announcement and the corresponding JORC 2012 compliant disclosures.

Accordingly, the Company issues this clarification in respect of the 5 January 2023 and 15 April 2025 announcements (together, the **Subsequent Announcements**) that:

- each Subsequent Announcement should have included a reference to the Original Announcement and a statement that the Company was not, at the time of release, aware of any new information or data that materially affects the exploration results presented in the Original Announcement;
- the Company confirms that such a statement remains true as at today – in that the Company continues to not be aware aware of any new information or data that materially affects the exploration results presented in the Original Announcement.

Separately, in each of the Subsequent Announcements, the Company provided photographs and commentary on certain visual observations that were designed to highlight the presence of sulphides in float samples rather than provide any indications of potential grade. However, the Company cautions readers of those announcements that visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations.

The Company is also now pleased to advise that after being awarded a \$275,000 Collaborative Exploration Initiative (CEI) grant announced on 15 April 2025, it has now secured the services of AED Drilling to drill the 800 m hole to test the Beefwood copper/gold target. The drilling has been tentatively planned for July 2025.

ENDS

This announcement has been approved by the Managing Director of Tartana Minerals Limited (ASX:TAT).

### About Tartana Minerals Limited (ASX:TAT)

Tartana Minerals Limited (ASX:TAT) is a copper producer with an existing heap leach – solvent extraction – crystallisation plant located on its Tartana mining leases in the Chillagoe Region of Far North Queensland. It has also been investigating the development of its primary copper and zinc resources located on these mining leases. Elsewhere it has an extensive exploration portfolio including the Chillagoe, Herberton and Ortona project areas and individual projects such as Cherry Tree, Beefwood, Dimbulah and Fulford. These projects cover copper, zinc, gold, silver, tin, tungsten and antimony projects and includes the Maid Gold Resource.

### **Disclaimer Regarding Forward-Looking Statements**

This ASX announcement contains various forward-looking statements. All statements, other than statements of historical fact, are forward-looking statements. Forward-looking statements are inherently subject to uncertainties in that they may be affected by a variety of known and unknown risks, variables and factors that could cause actual values or results, and performance or achievements to differ materially from the expectations described in such forward-looking statements. Tartana Minerals Limited does not give any assurance that the anticipated results, performance or achievements expressed or implied in those forward-looking statements will be achieved.

### **Competent Person's Statement**

The information in this announcement that relates to Exploration Results, Mineral Resource Estimates and the Production Target Range is based on information compiled by Dr Stephen Bartrop who is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM) and a Fellow of the Australian Institute of Geoscientists. Dr Bartrop has sufficient experience that is relevant to the styles of mineralisation and types of deposit under consideration, and to the activity that is being undertaken to qualify as a Competent Person, as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.' Dr Bartrop is an employee of Tartana Minerals Limited, and consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.
